

Do this ONLY after you have completed the problem yourself!

Examine the following student responses to the Question.

Which artifact demonstrates the strongest understanding of fractional representations? Why?
Which artifact demonstrates the weakest understanding of fractional representations? Why?
How would you address one of the misconceptions demonstrated by one of these responses?

Student Response #3

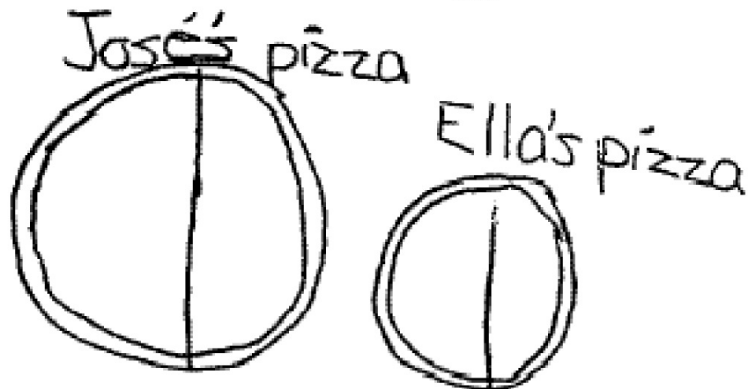

$$\frac{1}{2}$$

Jose could
be right
because it
is a maybe
bigger piece
or pizza.

Student Response #4

José could be right because his
pizza could be bigger than Ella's.

Student Response #5
